SHINE V THOMAS

IT INFRASTRUCTURE & CYBERSECURITY | SOFTWARE DEVELOPMENT

Bengaluru, Karnataka | +91 8105841179 | shineofficial79@gmail.com
linkedin.com/in/shinevthomas123 | github.com/shinevthomas

PROFESSIONAL SUMMARY

MCA student specializing in Cybersecurity and Artificial Intelligence, with a Bachelor of Computer Applications background and practical exposure to IT operations, endpoint management, and application development. Developing an endpoint reconciliation platform that consolidates asset inventory and endpoint-security information from multiple systems to help identify missing records, mismatches, and coverage gaps. Experienced with building web application features, integrating REST APIs, working with relational databases, and troubleshooting Linux-based environments. Interested in IT infrastructure, cybersecurity operations, endpoint protection, networking, and secure application deployment.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, C, SQL, HTML5, CSS3

Frontend: React.js, React Router, Axios, Flutter, Dart

Backend & APIs: FastAPI, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Mongoose

IT & Tools: Linux, Git, GitHub, VS Code, Postman, endpoint management, networking fundamentals

Security platforms: Wazuh, Trend Micro Vision One, Snipe-IT

PROJECTS

Endpoint Reconciliation Platform | React.js, Python FastAPI, PostgreSQL

- Developing a centralized reconciliation dashboard that combines IT asset inventory from Snipe-IT with endpoint-monitoring data from Wazuh and endpoint-security data from Trend Micro Vision One.
- Implemented asset search, reconciliation status tracking, exception and ignore-list handling, and identification of assets missing from endpoint-security or Wazuh records.
- Built backend reconciliation logic and API-driven data workflows to normalize asset identifiers, compare records across sources, and highlight mismatches for IT review.
- Designed the platform to reduce manual spreadsheet comparisons and improve visibility into endpoint coverage; supporting sync history and reconciliation reporting workflows.

SmartBiz ERP | React.js, Node.js, Express.js, MongoDB, JWT

- Built and deployed a full-stack ERP web application to manage inventory, sales, customers, invoices, reports, and dashboard analytics.
- Developed REST API endpoints and CRUD workflows, with JWT authentication and role-based access control for protected application features.
- Connected the React frontend to backend services and MongoDB, and deployed the application for browser-based access.
- Live demo: smartbiz-erp-eight.vercel.app | GitHub: github.com/shinevthomas/Smartbiz-erp

Campus Book Hub | Flutter, Dart, MySQL

- Developed a cross-platform campus library and book-exchange application focused on library record tracking and secondary-book exchange.
- Implemented data management and search features, including CRUD workflows and chatbot functionality to help users navigate app information.

EXPERIENCE

IT Intern | ATI Robotics

- Support IT operations and troubleshooting activities, with exposure to asset management, endpoint protection, networking, and system administration.
- Gain practical experience with Linux systems, security tools, server-related tasks, and maintaining reliable IT services.

EDUCATION

Master of Computer Applications (MCA) — Cybersecurity and Artificial Intelligence — JAIN (Deemed-to-be University) | 2026 – Present

Bachelor of Computer Applications (BCA) — St Aloysius (Deemed to be University), Mangaluru | 2026 | CGPA: 7.0

Pre-University (PCMB) — Jnanodaya Bethany PU College, Nellyadi | 2023 | 76%

SSLC — Santhom Vidya Niketan, Renjilady | 2021 | 76%

CERTIFICATIONS & LANGUAGES

Certifications: Certificate in Reasoning and Quantitative Technology • Certificate in Event Management • International Quest guest lecture demonstration: “Revolutionizing Industries”

Languages: English, Hindi, Malayalam, Tamil, Kannada, Tulu
